**Environmental consulting services ...
with a cause.** Get sustainable landscape consulting
services AND help support a worthy cause at the same time!

Natural Biodiversity's Conservation Services offers corporations exceptional land management services and uses the income generated by these contracts to help Natural Biodiversity's mission, involving stewardship projects atop public sites such as rail-trails, recreational parks, and schools.

Natural Biodiversity specializes in land restoration and enhancements, in one word, stewardship. Our services focus on and develop exceptional management practices, topping today's best practices through the application of terrestrial ecology and field testing.

Corporations: Find out how we can help you restore your lands, improve your PR potential, and enhance your bottom line through energy savings and human resource satisfaction!

Environmental consulting companies: Talk with us about potential collaborations! Because our specialties lie with natural invasive plant control and native plantings, we seek to expand partnerships, referrals, and project collaborations that will grow the most effective and efficient land stewardship endeavors.

Exemplary Management Practices - Going Beyond BMPs.

Invasive Plant Management Services:

- Inventory & Monitoring
- Management Prioritization & Planning
- Prevention Strategies
- Early Detection & Rapid Response
- Integrated & Nature-Based Solutions
- Native Plant Competition Installations

Native Planting Services:

- Inventory, Goal Creation & Site Plans
- Ecological Restoration Design
- Energy Savings through Native Plants
- Wildlife Habitat Restoration
- Storm Water, Riparian & Steep Slope

**We also specialize in increasing your
employee and client satisfaction
through service projects and
enhanced corporate sites.**
